

Quick Start Guide

Sending a CareSelect referral from MedTech-32

This guide has been created to show you the key steps involved in completing a CareSelect electronic referral (or print and fax where the specialist is yet to implement a compatible system). CareSelect has been designed to make it easier for you to search, find and refer a patient to the most suitable specialist care.

1. Open the patient record

Search for the patient and open their electronic medical record (EMR) in MedTech.

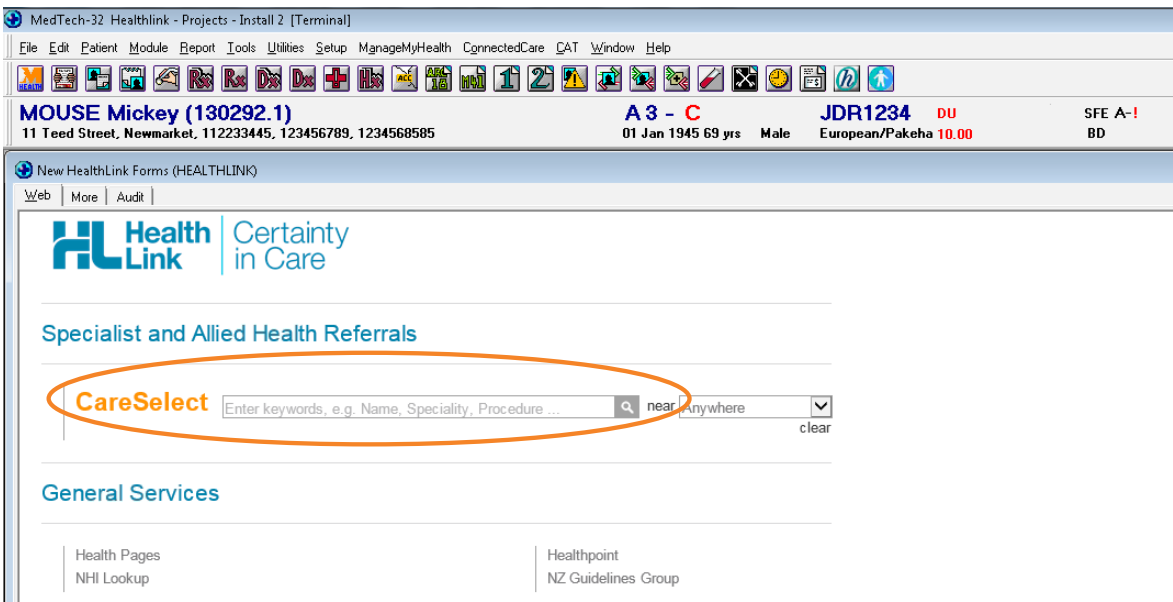

2. Select the HealthLink icon

Select the HealthLink icon above the patient details banner.

The referral launch page will display including a new search bar.

3. Use the search bar

Enter keywords in the search bar to search by name, specific specialty, interests, procedures and services, location and more.

To send a CareSelect referral, select the 'referral' link below the relevant specialist.

Specialist and Allied Health Referrals

To view the list of matching specialists, click on the search button or press 'Enter'.

The closest matches will be listed dynamically.

To make a referral, click on the 'referral' link.

If a specialist has a full biography in CareSelect (called a Full Bio) this is indicated in the search result by a photo and sometimes a logo. You can click on the result to see more important relevant information. Below is an example of a Full Bio.

Summary

I am a female Gynaecologist and have worked solely in private for the last 13 years, after combined public and private work in New Zealand for the previous 9 years.

I concentrate on spending as much time as necessary with women to work through their presenting problems, but also their general gynaecological health so that other problems are also picked up and dealt with. I also ensure that they have as much information about the options for treatment as possible to help them in making a decision as to the best option for them.

The clinic is staffed by women and the atmosphere is very supportive of their emotional needs.

I specialise in vulval conditions, vulvodynia and psychosexual problems; colposcopy and treatment of abnormal smears and abnormal bleeding; menorrhagia and all options for treatment of this; hysteroscopic surgery; assessment of pelvic pain and infertility; menopause and related problems; incontinence and stress incontinence surgery, although currently cannot offer the Urodynamics.

4. Complete the referral

The CareSelect referral will display and is very similar in format and functionality to the DHB eReferral form.

Complete the relevant fields under each tab on the left. You can park the form if you want to work on it later.

GENERAL SURGERY SPECIALIST REFERRAL

Referral Priority: Immediate Urgent Routine

ACC:

Reason / provisional diagnosis*

Relevant history & physical examination findings*

Measurement Details

Date	Code	Value
27/09/2013	Height	170
27/09/2013	Weight	60

Date	Code	Value
27/09/2013	BMI	20.8
	BP	

5. Submit the CareSelect referral form

Select the 'Submit' button when you are ready to send your referral to the specialist. CareSelect will send the referral electronically if the specialist has a compatible system, otherwise you will be prompted to print and fax.

If you want to print a copy of the referral, select 'Print' at the end of your submitted form, remembering to select your default printer.

Pages:

Enter either a single page number or a single page range. For example, 5-12

Number of copies:

6. Print a specialist's contact details

To print a contact page to hand to the patient, click on the 'contact' link either from the search bar or the search results page. Simply print the summary contact page that is displayed.

7. Practice sending a CareSelect referral

For training purposes or to familiarise yourself with the system, feel free to send a sample referral to HealthLink by searching for 'Linda Hefford' in the CareSelect search bar.

**For all CareSelect referral queries,
please call the HealthLink Customer Support Line:**
